SUMITH MITTAPELLI

+919493632462⋄ Hyderabad, INDIA
m.sumith231@gmail.com ⋄ linkedin.com/in/sumith-mittapelli-6aa6a0200

OBJECTIVE

Software Engineer with professional experience in automation testing and hands-on knowledge of AWS cloud and networking. AWS Certified Cloud Practitioner, currently developing CCNA-level networking expertise through practical Cisco labs covering routing, switching, network security, and troubleshooting. Seeking opportunities in Cybersecurity, Cloud Security, or Network Engineering where I can leverage my software, cloud, and networking experience to build and troubleshoot secure IT systems.

TECHNICAL SKILLS

Programming:	Java, Python
Cloud:	AWS(EC2, VPC, CloudFormation, EFS, S3, RDS, Lambda)
Networking:	Cisco Networking / CCNA-level knowledge - (IPv4/IPv6, Subnetting, VLANs, Trunking, STP/Rapid PVST, NAT, DHCP, ACLs, OSPF, HSRP)
Automation Testing:	Selenium, TestNG, Data-Driven Testing
OS, Version Control& Scripting:	Linux, Git, Bash Shell
Tools & Automation:	Microsoft Power Automate, Power Virtual Agents, Packet Tracer
Cybersecurity :	Linux Security, AWS IAM, VPC Security

EXPERIENCE

Associate Software Engineer Dec' 2024 – May' 2026
Tech Mahindra Limited *Hyderabad*

- Developed and maintained Selenium-based test automation using Java and TestNG, increasing regression test coverage and reducing manual testing effort.
- Implemented Page Object Model (POM) and data-driven testing to improve test-suite maintainability, reusability, and scalability.
- Designed automated test cases for functional and regression testing and contributed to defect identification and troubleshooting.

Internship May' 23 - July' 23
TechStar Group Inc *Hyderabad*

- Built a chatbot solution using Microsoft Power Platform to automate internal employee service queries.
- Developed automated workflows using Microsoft Power Automate and Power Virtual Agents to streamline employee support processes.
- Reduced query resolution time by approximately 50% through automated responses and workflow integration.

PROJECTS

Web Application Test Automation using Selenium & TestNG (OrangeHRM)
Tools Used: Java, Selenium WebDriver, TestNG, Maven, OrangeHRM Demo Application

- Automated test execution for Login, PIM, Admin, and Recruitment modules using Java, Selenium WebDriver & TestNG.
- Adopted Page Object Model (POM) to improve maintainability and reduce script redundancy.
- Used DataProviders and assertions for robust parameterized automation and reporting.

Serverless Image Processing using AWS Lambda & OpenCV
Tools Used: AWS Lambda, S3, SES, IAM, Lambda Layers, Python, OpenCV (headless)

- Designed an event-driven pipeline triggered on S3 uploads; Lambda function processed images and stored outputs in a target bucket.
- Integrated Lambda Layers for OpenCV dependencies and optional SES notifications for file delivery.
- Implemented IAM roles and least-privilege access policies for secure Lambda–S3 interactions.

Design and Development of a Deep Learning-Based Model for Anomaly Detection in IoT Networks
Tools Used: Python, TensorFlow, CNNs, Jupyter Notebook

- Developed a CNN-based intrusion detection model to classify malicious and benign IoT network traffic, achieving 94% classification accuracy.
- Applied feature selection and preprocessing techniques to improve the model's ability to identify anomalous network traffic.
- Evaluated the model for IoT intrusion and anomaly detection use cases.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering 2020 - 2024
Matrusri Engineering College - CGPA: **8.1**

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)
Foundational knowledge of AWS Cloud concepts, security, identity and access management (IAM), and pricing.

EXTRA-CURRICULAR ACTIVITIES

- **Inter-College Chess Competition** - Osmania University 2023
